Extra Fine Finish. Square Selvedge. Solid Square Box. Screwed. Double Link. Fine Flat Bow Keys. 12 changes of Keys.

Nos. 250 and 254 described as "Detector" locks are so constructed that any attempt to operate the locks with any but the right key, upsets the locking mechanism so that thereafter no key, not even the right one, will operate the lock until the right key has been inserted and turned to the left, after which the proper key will operate the lock. Thus the owner is made aware of any unauthorized attempt to gain access to the lock, a valuable feature found in Eagle locks exclusively.

Locks furnished Alike or Alike in Sets at an extra price.
